

3. USB wireless handle + mobile phone screen remote control tutorial

3. USB wireless handle + mobile phone screen remote control tutorial

3.1. Open steps

3.1. Open steps

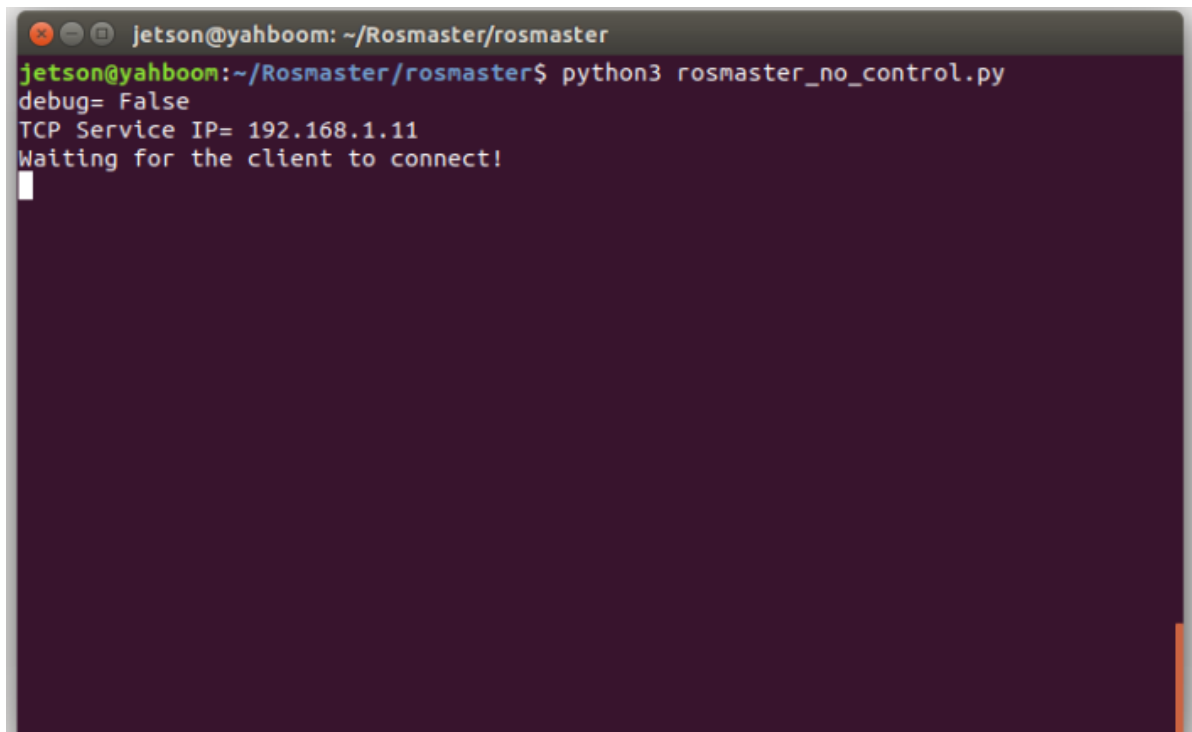

- After booting into the program, first close the large program, you can refer to the second section of "05. ROSMASTER Basic Control Tutorial" "2. Turn off the self-starting large program".
- Open a terminal, type,

```
roslaunch yahboomcar_bringup bringup.launch #launch chassis + remote control
```

- Open another terminal and enter

```
cd ~/Rosmaster/rosmaster
```

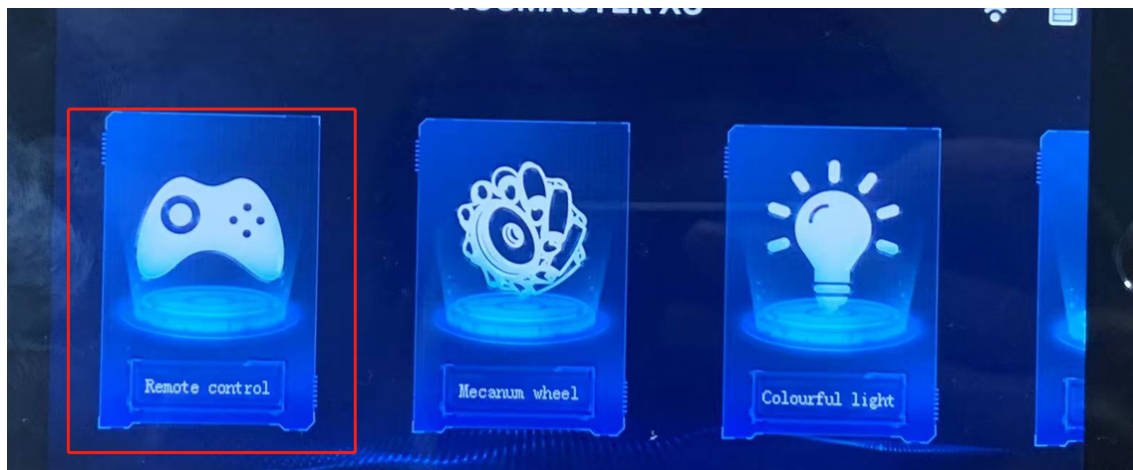

```
python3 rosmasetr_no_control.py
```

A terminal window with a dark purple background. The title bar shows 'jetson@yahboom: ~/Rosmaster/rosmaster'. The prompt is 'jetson@yahboom:~/Rosmaster/rosmaster\$'. The command 'python3 rosmasetr_no_control.py' has been entered. The output shows 'debug= False', 'TCP Service IP= 192.168.1.11', and 'Waiting for the client to connect!'. A white cursor is on the line following the last message.

```
jetson@yahboom: ~/Rosmaster/rosmaster
jetson@yahboom:~/Rosmaster/rosmaster$ python3 rosmasetr_no_control.py
debug= False
TCP Service IP= 192.168.1.11
Waiting for the client to connect!
█
```

- Refer to the "Mobile APP Remote Control Tutorial" in "03. Mobile Phone Remote Control Tutorial", connect the mobile phone to the rosmaster, and then you can see the screen transmitted by the rosmaster on the mobile phone screen.
